

# LOGIC MODEL AND COMMON TYPES OF EVALUATION

## Types of evaluation

Needs/asset assessment:	Process evaluation:	Outcome evaluation:	Impact evaluation:
<p>What are the characteristics, needs, priorities of target population?</p> <p>What are potential barriers/facilitators?</p> <p>What is most appropriate to do?</p>	<p>How is program implemented?</p> <p>Are activities delivered as intended? Fidelity of implementation?</p> <p>Are participants being reached as intended?</p> <p>What are participant reactions?</p>	<p>To what extent are desired changes occurring? Goals met? Who is benefiting/not benefiting? How?</p> <p>What seems to work? Not work?</p> <p>What are unintended outcomes?</p>	<p>To what extent can changes be attributed to the program?</p> <p>What are the net effects? What are final consequences?</p> <p>Is program worth resources it costs?</p>
